**A-SYNCHRO mechanism**

— A-SYNCHRO mechanism with max. 20° inclination (+10° ÷ -10°) of the backrest and 20° inclination (+5° ÷ -15°) of the seat. The backrest and the seat can be adjusted separately from one another. The tension of the backrest can be adjusted according to the user's weight by turning the side handle. Both the seat and the backrest are equipped with an anti-shock system, which allows the backrest and the seat

to be easily locked in 5 different positions. Additionally, the integrated seat slider performs a total travel of 65mm and can be locked in 6 positions thanks to an innovative and patented cable system that makes the mechanism easy and quick to use, improving the final design of the chair. The cables can be installed either on the right side or on the left side of the seat, so as not to interfere with levers or armrests.

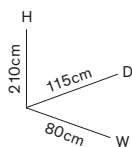

**Free seat position**

**Packaging reference**

pcs x box	24
pcs x pallet	96
gross weight	600 kg
volume	1,93 m <sup>3</sup>
